MISSION

inPEST is GEA's Pest Management brand.
A brand which is specifically designed for the
Trained professional in the world of monitoring
and IPM.

VISION

inPEST wants to be a key brand in the world of
sustainable / green pest control in Europe.

OUR CERTIFICATIONS

UNI EN ISO 9001:2015
Quality management systems

UNI ISO 21001:2018
Management systems for educational organizations

ISO 45001:2018
Occupational health and safety management systems

UNI EN ISO 14001:2015
Environmental management systems

inPEST lab is GEA srl's training division, whose purpose is to study and divulge the most important and up to date topics on IPM (Integrated Pest Management).

It therefore proposes training courses, refresher courses, and scientific consultancy to pest control professionals.

inPEST lab for your specific and professional training in the IPM

PHEROMONES AND FOOD TABLETS

Phero-Si inPEST

After years of research and innovation, the GEA R&D Team has achieved its goal of **optimizing** and **improving** silicone pheromone supports. The team's efforts led to the replacement of the previous device with a more **innovative** version: the new **"Phero-Si"** pheromone dispenser in PEST, made with ad-hoc silicone blend.

The new dispenser has a characteristic **cylindrical** shape, more **easy-to-handle**, with **more weight** and a **larger emission surface**.

The choice of the new silicone mould also made it possible to:

- use a mixture more suitable for use in the food industry,
 - improve the emission of pheromones with which the devices are loaded,
 - increase effectiveness in the field, promptly detecting even the low presence of pests and returning a higher number of target catches,
 - guarantee a better pheromone emission over time compared to para dispensers,
 - create a fully metal detectable version of the device, "Phero-Si MD"
- in PEST, by adding ferrite to the silicone blend. This technical aspect is increasingly important in food companies and required by the main certification standards (BRC, IFS, etc.).

Pheromones and food tablets

inPEST pheromone line exploits the ability of insects to perceive specific semiochemical molecules (pheromones) to alter their behavior.

Due to reduction of insecticides and active substances on the market it is vital to find new techniques to face an ever demanding regulation, with the use of **integrated pest management (IPM)** in all its forms.

With this in mind, inPEST pheromone line gives the possibility of monitoring a large quantity of species reducing the environmental impact to the minimum.

In inPEST pheromone line it is also possible to find pheromone dispensers for Mating Disruption Technique to face insects infestations by preventing their reproduction.

Some of the products in this section (Phero-Si silicone supports for pheromones) are available in the **metal detector version Phero-Si MD**.

Precautions of use:

To avoid altering the efficacy of the dispensers it is suggested to handle the products with gloves.

Attention:

All the vials in this section must be used closed (as shown in the picture), for a better functioning.

TARGET PEST:

SUGGESTED TRAPS:

FOCUS: MATING DISRUPTION TECHNIQUE

The method consists of saturating the environment with overdoses of the sex pheromone that is normally emitted by the female of each specific targeted insect, to an extent that prevents the male from locating and fertilising the female.

OBJECTIVE:
TO REDUCE THE NUMBER OF MATINGS
OF THE PEST POPULATION

HOW?

By spreading a high quantity of synthetic pheromone, using high-dose dispensers.

This is to interfere with the perception and response of the male to the sex pheromone emitted by the female according to the following mechanisms:

- ✓ THE MALES ARE UNABLE TO LOCATE THE FEMALE WHOSE NATURAL CALL IS "MASKED"
- ✓ HABITUATION OF THE NERVOUS SYSTEM
- ✓ THE MALE'S SENSORY RECEPTORS ARE SATURATED

ADVANTAGES

- HIGHLY SPECIFIC AGAINST TARGETED INSECTS
- SAFE FOR USERS
- NO INTERFERENCE WITH OTHER BIOLOGICAL CONTROLS
- NO DAMAGE TO THE ENVIRONMENT

TWIST-TIE MD²

METAL DETECTABLE MATING DISRUPTION

TWIST-TIE MD² inPEST®

COMPOSITION:

Blue or grey silicone and ferrite Twist Tie MD²

SEX PHEROMONE:

(9Z,12E)-Tetradeca-9,12-dien-1-yl acetate (CAS: 30507-70-1)

REGISTERED PRODUCT:

BIOCIDE PRODUCT
Authorization
no.: FR-2020-0028

TARGETED INSECTS:

(used in efficacy trials):

Plodia interpunctella and *Ephestia kuehniella*

ADDITIONAL TARGETED INSECTS:

Ephestia elutella, *Cadra cautella*,
Cadra calidella and *Cadra figulilella*

WHERE TO USE IT?

Food industry, production and storage.

HOW TO USE?

1 m of **Twist-Tie MD² inPEST®** covers 300 m³. It can be directly installed on installations or structural elements, such as electrical conduits, shelves, pillars, by marking it with its warning sign.

ADVANTAGES TWIST-TIE MD² inPEST®

Compared to other dispensers available on the market, it is a fully **metal detectable instrument** as ferrite, which gives it this property, is included in the holder.

Detectability is a key requirement for BRC and IFS food safety standards.

Furthermore, once the total amount of linear metres of Twist Tie MD² to be used has been established based on the volumes to be treated (1 m of Twist-Tie MD² inPEST® saturates 300 m³), its special format (Tie) allows it to be portioned, by simple cutting. In this way, portions of the string can be distributed evenly throughout the room or concentrated around critical machinery or installations.

Another advantage of the **Twist-Tie MD²** is its greater visibility compared to an ordinary dispenser, a feature that is not secondary in terms of the efficiency of the service provided to replace it once it is no longer operational.

FOOD INDUSTRY CRAWLING INSECTS

FOOD INDUSTRY CRAWLING INSECTS

3 Way Line Necrobia Line

Monitoring pests with specific traps lets obtain immediate feedback on the appearance of an infestation.

inPEST has designed a trap specifically for monitoring food industry beetles.

This trap's shape grants access to insects, which are usually hard to catch, thanks to an innovative food based tablet integrating it with a multi-species pheromone dispenser.

GOOD REASONS TO CHOOSE OUR "3WAY LINE":

- Easy to use:
Just insert the cardboard trap in the plastic base and close with a simple "click"; the innovative, reusable cover protects the trap from dust and damp, guaranteeing efficacy of the adhesive surface for over a month.
- Easy to remove, it's impossible to get dirty!
- "Dust-proof" glue: the top and bottom adhesive surface of the cardboard trap is spread in parallel stripes in order to increase dust resistance.

STORAGE CONDITIONS OF GLUE TRAPS:

Stored in a cool and dry place (lower than 25°C / 77°F and 55% R.H.) in their original packaging.
Products are guaranteed to perform correctly up to 3 years.

3 WAY TRAP

Cardboard glue trap with **dust-proof** glue. The peculiar way the glue is spread on the trap also increases the available glue surface.

✓ **MUST BE ACTIVATED WITH SPECIFIC PHEROMONES AND/OR WITH FOOD TABLET.**

FOOD INDUSTRY FLYING INSECTS

FOOD INDUSTRY FLYING INSECTS

inPEST's food industry flying insects monitoring line counts the largest number of glue traps and pit fall traps on the market.

Adhesives and materials used are specifically studied to give optimal results even in "extreme" situations such as dusty environments, damp environments or outdoors.

In combination with pheromone dispensers of the inPEST pheromone line, it is easy to check the presence of target insects in the monitored areas.

TARGET PEST:

Ephestia kuehniella, *Plodia interpunctella*, *Lasioderma serricorne*, *Nemapogon granella*, *Tineola bisselliella*, *Tinea pellionella*.

STORAGE CONDITIONS OF GLUE TRAPS:

Stored in a cool and dry place (lower than 25°C / 77°F and 55% R.H.) in their original packaging.

Products are guaranteed to perform correctly up to 3 years.

MASS® TRAP

Funnel trap with collector plastic bag. Particularl suitable for food industry moths in dusty environments such as mills.

✓ **MUST BE ACTIVATED WITH SPECIFIC PHEROMONES.**

PHEROMONES SOLD SEPARATELY

| | |
|------|---|
| CODE | P-25003 |
| PACK | Sales unit 10 pcs (includes 30 plastic bags) |

REPLACEMENT BAG

| | |
|------|-------------------|
| CODE | P-04207I |
| PACK | Sales unit 50 pcs |

TARGET PESTS:

Plodia interpunctella

Ephestia kuehniella

Ø 175 mm

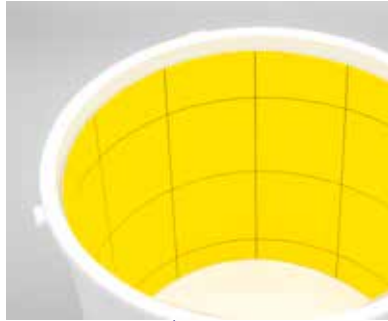

POLITRAP

Pitfall trap ideal for use with water or glue board (P-04024GLUESO).

✓ **MUST BE ACTIVATED WITH SPECIFIC PHEROMONES.**

METAL-DETECTABLE PRODUCTS

METAL-DETECTABLE PRODUCTS

Dedicated line to the real IPM professionals

inPEST strives every day to offer its customers quality products that are ideal tools to allow PCO / Trained Professional to carry out effective interventions, respectful of both environment and current regulations.

The ideal customer for this product line have professionalism and competence for an advanced IPM

A line entirely detectable by metal detector.

The customer will find in these pages the most complete line of detectable by metal detector inPEST products for the Pest Control market. The Detectable Products Line is indeed, together with the Pheromones Line, the spearhead of inPEST.

It is the result of years of Research & Development on products, innovation and experience in the market of professional devices for pest monitoring.

All the advantages of ferrite.

Ferrite-enriched inPEST products offer PCO / Trained Professional enormous advantages during interventions, with a modestly higher cost than non-detectable products.

The traceability and product's positioning control are great key elements during interventions and an inPEST product detectable by the metal detector guarantees easy traceability and positioning control. All thanks to ferrite.

inPEST products have been made in such a way as to be detectable to the metal detector even only in really tiny part (if, for example, the product splinters) allowing to easily identify its position even if it is not intact.

The use of this kind of products is strongly suggested, for example, in the food industries and in all those environments where is essential absolute control over the positioning of the products used for the intervention.

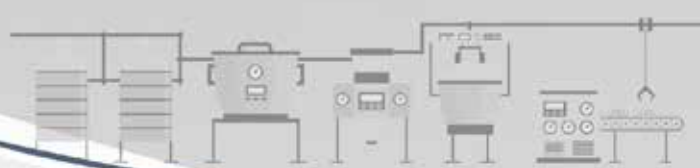

**DETECTABLE PRODUCTS LINE:
monitoring with safety**

Wide range of pheromones to monitor the main food industry's pests.

Version added with metal detectable ferrite to ensure greater safety in compliance with BRC and IFS standards.

AND NOT JUST PHEROMONES.
DISCOVER OUR LINE OF
METAL DETECTABLE PRODUCTS

METAL-DETECTABLE PRODUCTS

■ PHERO - SI MD

Gray support in **silicone** and **ferrite**, fully detectable by metal detector.

| | |
|--------------|------------------------|
| CODE | P-XXXXXD |
| PACK | 1 pc (strips of 3 pcs) |
| OUTER CARTON | Sales unit 15 pcs |

For the complete list of target insects & supports for pheromones with detectable version see pages 10 - 21.

BIOCIDE PRODUCT
Authorization N. FR-2020-0028

■ Twist Tie MD² inPEST® Grey
grey metal detectable mating disruption twist tie
Plodia interpunctella, *Ephestia kuehniella*

Sexual pheromone.
REGISTERED PRODUCT

| | |
|--------------|-----------------|
| CODE | P-01156 |
| PACK | 1 pc |
| OUTER CARTON | Sales unit 10 m |

■ Twist Tie MD² inPEST® Blue
blue metal detectable mating disruption twist tie
Plodia interpunctella, *Ephestia kuehniella*

Sexual pheromone.
REGISTERED PRODUCT

| | |
|--------------|-----------------|
| CODE | P-01162 |
| PACK | 1 pc |
| OUTER CARTON | Sales unit 10 m |

TARGET PESTS:

Plodia interpunctella

Ephestia kuehniella

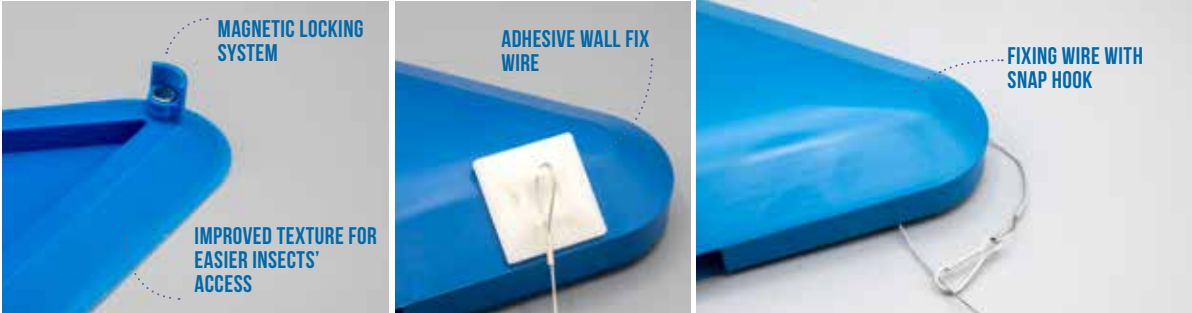

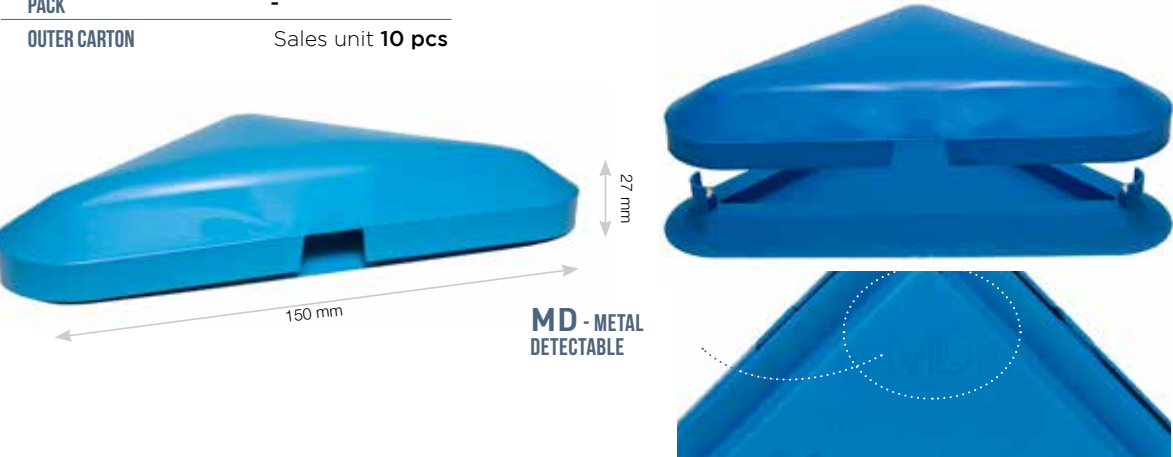

MAGNETIC TRAP DETECTABLE

Polypropylene plastic shell metal detectable closed with the use of extra strong magnets.
Glue/pitfall trap sold separately (see pages 25).

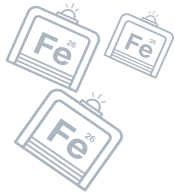

New version with extended borders that protect the internal trap from dust.

| | |
|--------------|-------------------|
| CODE | P-04131MAGF |
| PACK | - |
| OUTER CARTON | Sales unit 10 pcs |

IDEAL FOR:

FLASH OIL MAGNETIC TRAP Detectable

Metal detectable polypropylene shell

| | |
|------------|-------------------|
| CODE | P-04331MAGF |
| PACK | - |
| OUTER PACK | Sales unit 10 pcs |

IDEAL FOR:

EASY TRAP

Cardboard glue trap with “dust-proof” glue.

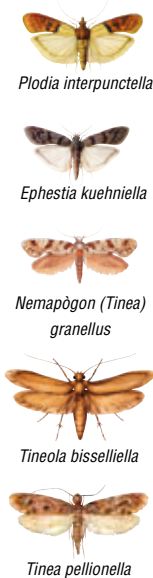

- ✓ **MUST BE ACTIVATED WITH SPECIFIC PHEROMONES**
METAL DETECTABLE
 PHEROMONES SOLD SEPARATELY

| | |
|--------------|--------------------------|
| CODE | P-04078 |
| GLUE AREA | 2 areas 120x150 mm |
| PACK | 5 pcs |
| OUTER CARTON | Sales unit 60 pcs |

TARGET PESTS:

EASY TRAP PHERO PACK

Ephestia kuehniella e *Plodia interpunctella*.

Cardboard glue trap with “dust-proof” glue.
 Ready to use, packed in barrier film.

- ✓ **PRE-ACTIVATED WITH SPECIFIC PHEROMONES**
METAL DETECTABLE

| | |
|--------------|--|
| CODE | P-04078PP |
| GLUE AREA | 2 areas 120x150 mm |
| PACK | 3 pcs in laminated barrier film (each piece is composed of 1 Easy trap P-04078 + 1 pheromone P-01048D) |
| OUTER CARTON | Sales unit 30 pcs |

DETECTABLE PEN

Retractable detectable pen made to be detected and rejected by typical metal detection machines.

- ✓ **IDEAL FOR USE IN FOOD FACTORIES.**

| | |
|------|--------------------------|
| CODE | P-08028 |
| PACK | Sales unit 10 pcs |

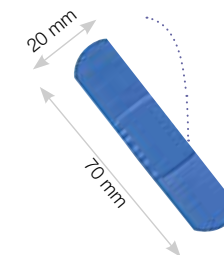

CERABILE

High visibility (blue) sterile metal detectable plaster. Thanks to an internal metal strip this plaster is detected by metal detectors.

- ✓ **SUITABLE FOR USE IN FOOD INDUSTRIES**

| | |
|--------------|--|
| CODE | P-08001 |
| PACK | 50 pcs |
| OUTER CARTON | sales unit 1000 pcs (20 packs) |

INTERNAL
METAL STRIP

CABLE TIE MD

Plastic reusable cable ties detectable to the metal detector. Ideal for securing safety containers and multi-media traps with fixed supports.

| | |
|------|---------------------------|
| CODE | P-08033 |
| PACK | Sales unit 100 pcs |

IDEAL FOR:

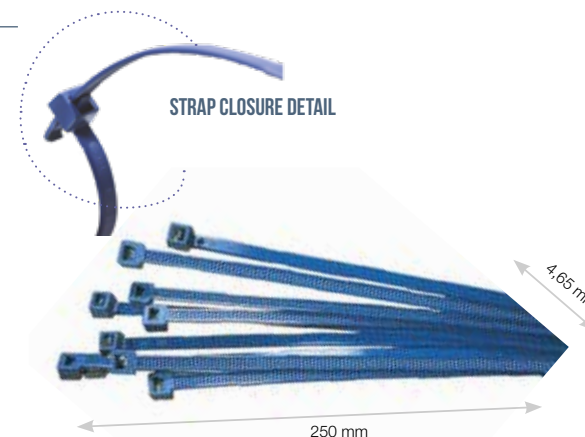

MULTI CATCH METAL
P-03036

UNIBOX
P-03039
P-03039T

EASY TRAP
P-04078

EASY TRAP
PHERO PACK
P-04078PP

... AND OTHER MONITORING DEVICES.

COCKROACHES AND BED BUGS

COCKROACHES

In an IPM program one of the focus points is to understand how the infestation is distributed in the environment.

inPEST's COCKROACH LINE offers a large variety of top end monitoring products. The range is composed of different traps made with high quality materials, from cardboard to corrugated plastic, that guarantee a higher durability of the devices.

One of the most noteworthy products is the **GEOTRAP**, the only trap on the market pre-activated with highly attractant gel. The quality of the glue and the new attractant formulations (in gel or tablets), combined with a correct positioning of the traps, guarantee a high number of catches.

Target:

Blattella germanica, *Blatta orientalis*, *Supella longipalpa*, *Periplaneta americana*.

STORAGE CONDITIONS OF GLUE TRAPS:

Stored in a cool and dry place (lower than 25°C / 77°F and 55% R.H.) in their original packaging.
Products are guaranteed to perform correctly up to 3 years.

BED BUGS

Monitoring bed bugs infestations is vital to identify the presence of these pests as fast as possible.

inPEST's BED BUGS TRAP AND EASY BUGS are designed to reveal the presence of the pest BEFORE it manages to resettle in the area.

Note: bed bugs are extremely difficult pests to identify and manage.

Bed Bugs Trap and Easy Bugs are a tool for monitoring the activity of *Cimex lectularius* and other mites.

Bed Bugs Trap and Easy Bugs mimics the hiding place of bed bugs (dark narrow places).

Target:

Cimex lectularius

COCKROACHES - GLUE BOARDS - CARDBOARD

GEOTRAP

Pre-activated with attractant gel on the glue surface.

✓ AROMA LICORICE

| | |
|--------------|------------------------|
| CODE | P-04047 |
| GLUE AREA | 90 x 145 mm |
| PACK | 20 pcs |
| OUTER CARTON | sales unit 200 pcs |
| PALLET | 12000 pcs, 80x120x115h |

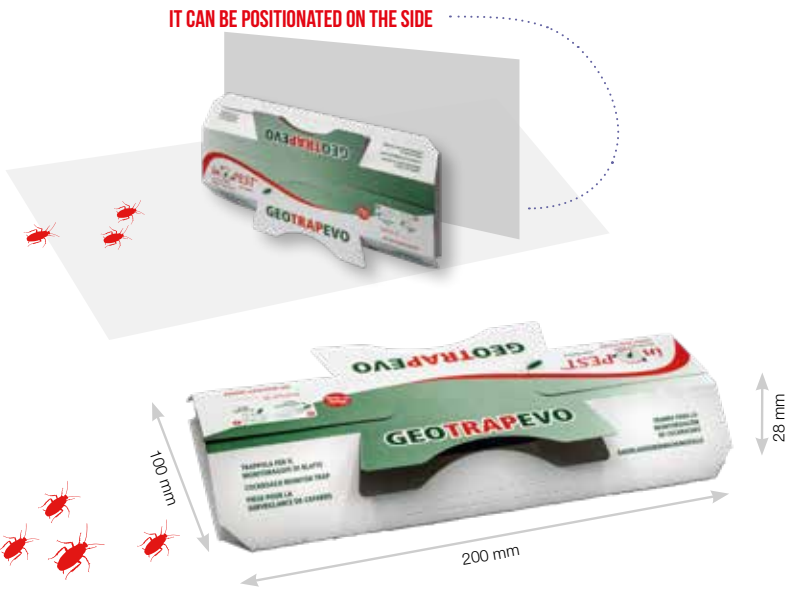

GEOTRAP EVO

Thanks to its peculiar shape it can be positioned on the side still allowing full access to cockroaches.

✓ AROMA LICORICE

| | |
|--------------|------------------------|
| CODE | P-04147 |
| GLUE AREA | 90 x 165 mm |
| PACK | 20 pcs |
| OUTER CARTON | sales unit 200 pcs |
| PALLET | 12000 pcs, 80x120x115h |

COCKROACHES - GLUE BOARDS - CARDBOARD

■ GEOTRAP MINI

Pre-activated with attractant gel on the glue surface.

✓ **SMALL AND DISCREET**

✓ **AROMA LICORICE**

| | |
|--------------|--------------------------------|
| CODE | P-04094 |
| GLUE AREA | 70 x 115 mm |
| PACK | 20 pcs |
| OUTER CARTON | sales unit 100 pcs |
| PALLET | 21000 pcs , 80x120x140h |

■ SCAR4TRAP

Can be split in 4 small detectors. They can be easily placed to reach difficult areas thanks to the double sided tape on the back of the trap.

✓ **IDEALS TO REACH DIFFICULT AREAS**

✓ **AROMA LICORICE**

| | |
|--------------|----------------------------|
| CODE | P-04013 |
| GLUE AREA | 105 x 50 mm |
| PACK | 20 pcs (4 in 1) |
| OUTER CARTON | Sales unit, 200 pcs |
| PALLET | 16800 pcs |

COCKROACHES - GLUE BOARDS - PLASTIC

■ GEOTRAP PLASTIC

Pre-activated with attractant gel on the glue surface.

✓ THE ONLY WATERPROOF COCKROACH TRAP.

✓ AROMA LICORICE

| | |
|--------------|-----------------------|
| CODE | P-04002GEL |
| GLUE AREA | 90 x 145 mm |
| PACK | 10 pcs |
| OUTER CARTON | Sales unit, 100 pcs |
| PALLET | 5600 pcs, 80x120x160h |

■ INSECT PAD

Small ready to use detector that can be placed inside monitor guard (P-04081) .

✓ AROMA LICORICE

| | |
|--------------|---------------------|
| CODE | P-04074 |
| GLUE AREA | 40 x 65 mm |
| PACK | 10 pcs |
| OUTER CARTON | Sales unit, 100 pcs |

COCKROACHES - GLUE BOARDS - PLASTIC

■ MONITOR GUARD

Rigid plastic station for monitoring cockroaches with the use of insect pad for **insect pad.**

✓ CAN BE INSTALLED VERTICALLY ON SHELVES

| | |
|--------------|-------------------|
| CODE | P-04081 |
| OUTER CARTON | Sales unit 50 pcs |

IDEAL FOR:
INSECT PAD
P-04074

GLUE BOARDS - COMPLEMENTARY PRODUCTS

■ ROACH TAB

Non-toxic food tablet specifically formulated for cockroaches.

| | |
|--------------|---------------------|
| CODE | P-01052 |
| PACK | 10 pcs in blister |
| OUTER CARTON | Sales unit, 200 pcs |

✓ IT DOES NOT CONTAIN ALLERGENS

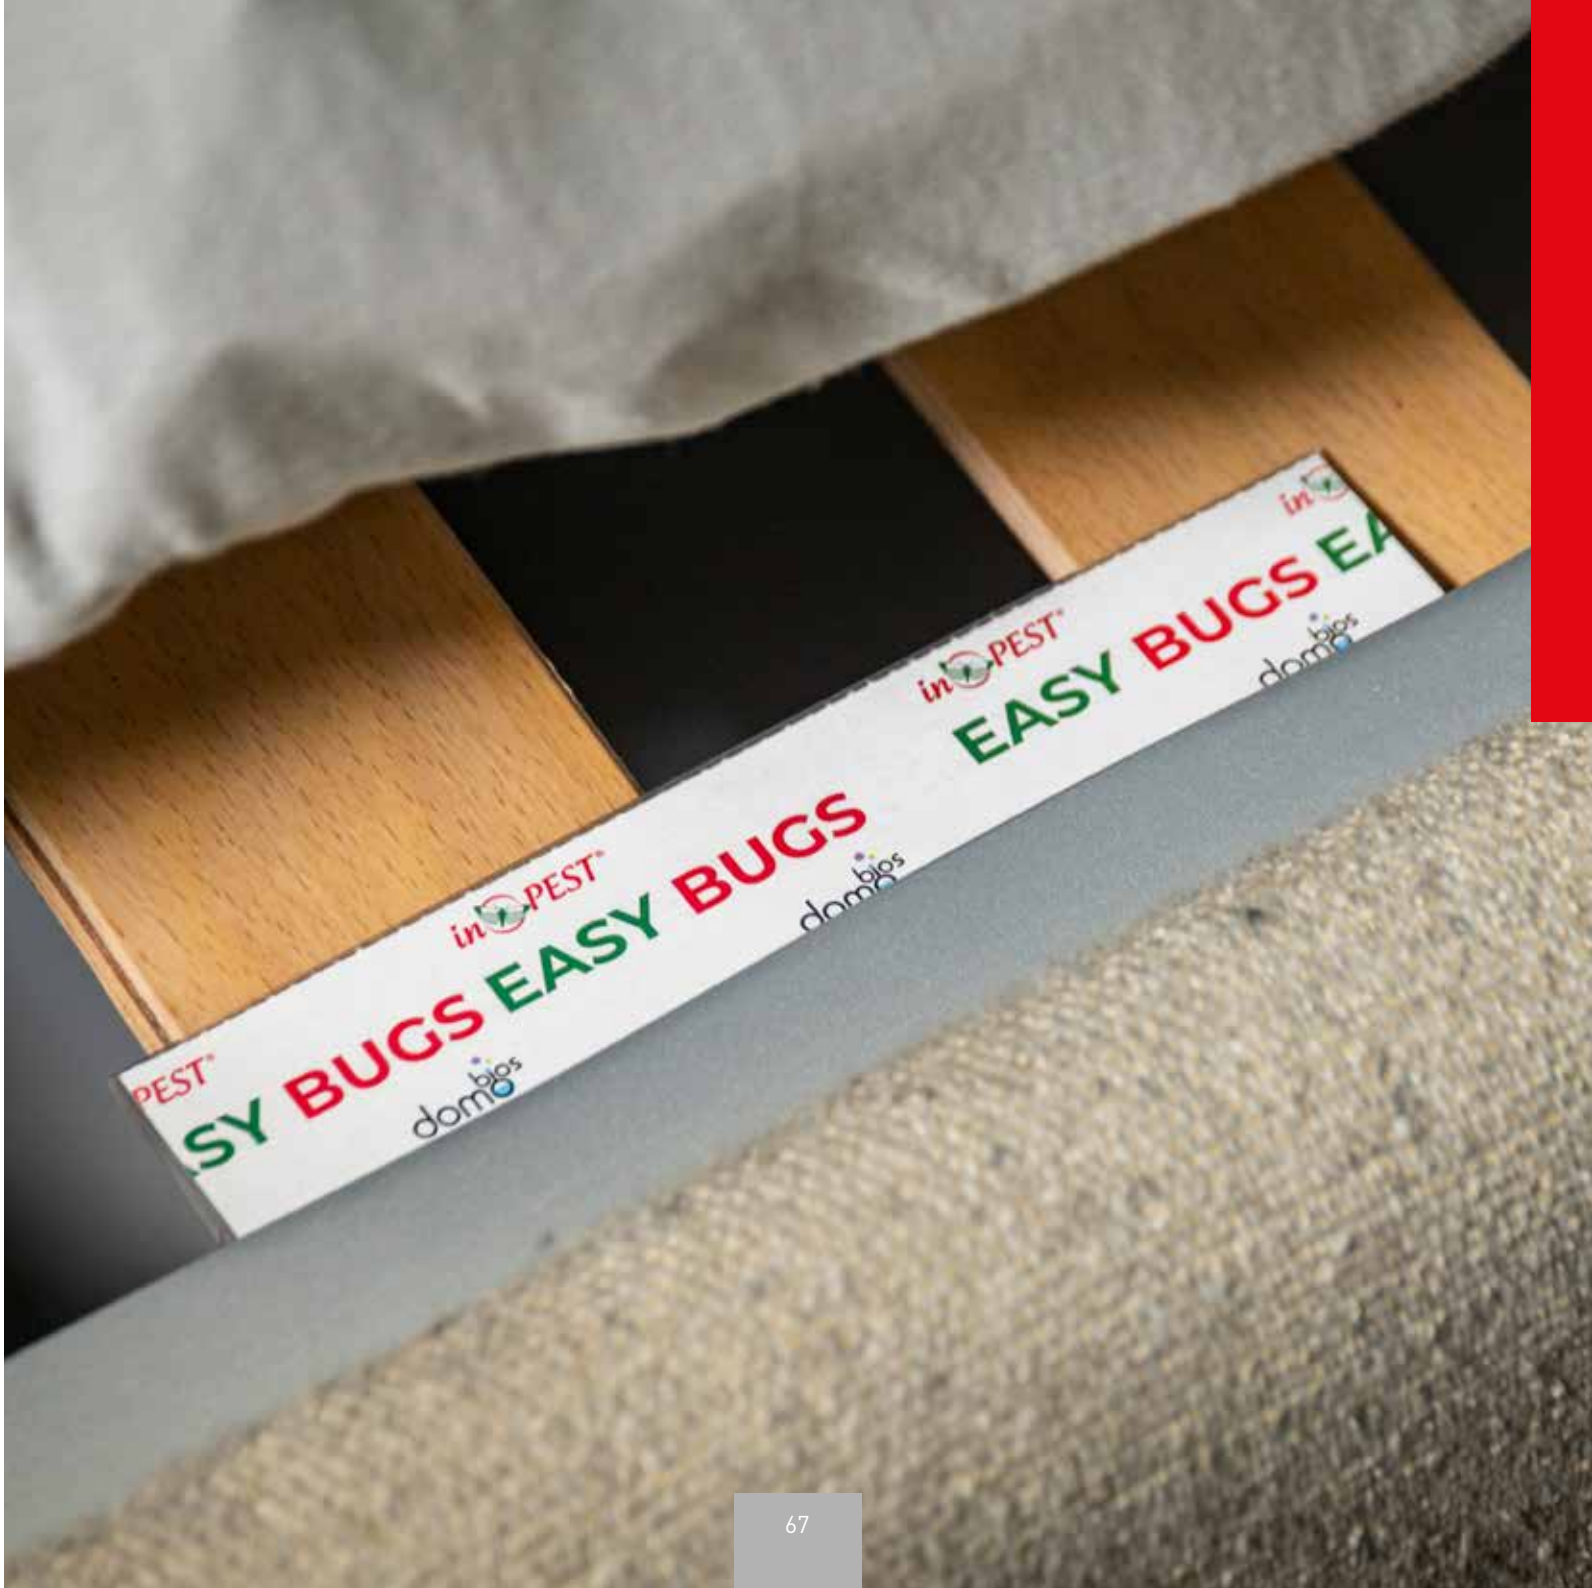

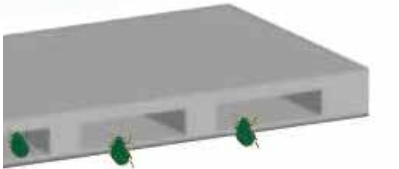

BED BUGS

EASY BUGS

Passive adhesive trap to monitor *Cimex lectularius*. Once the insects access the device through the specially designed entrance holes, they get stuck on their backs rather than by the legs as it normally happens in traditional glue traps .
This way bed bugs will perceive the trap as a harborage and will start emitting aggregation pheromone attracting other individuals of the same species.

✓ **DOUBLESIDED ADHESIVE STRIPS ARE INCLUDED IN THE PACKAGE AND CAN BE USED TO ATTACH THE TRAP TO SURFACES.**

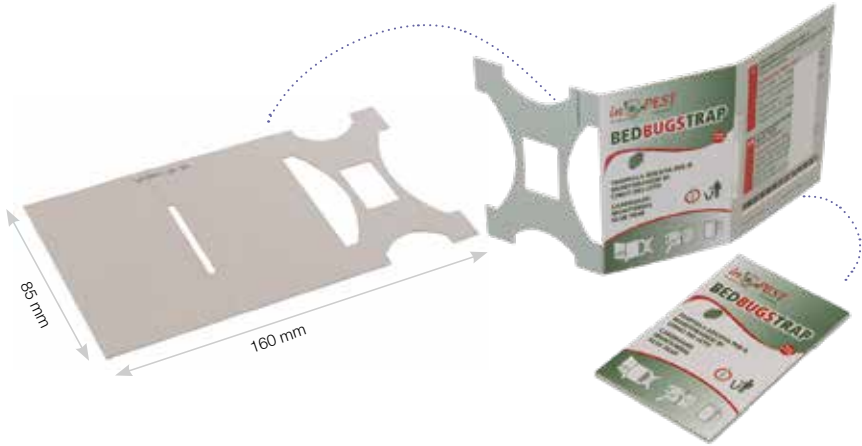

| | |
|--------------|----------------------|
| CODE | P-04181 |
| GLUE AREA | 77,5 x 25 mm |
| PACK | 10 pcs |
| OUTER CARTON | Sales unit 50 pcs |

BED BUGS

BED BUGS TRAP

| | |
|--------------|-----------------------|
| CODE | P-04179 |
| GLUE AREA | 2 areas 70x40 mm each |
| PACK | 10 pcs |
| OUTER CARTON | Sales unit 30 pcs |

BED BUGS TAPE

Use around bed legs and in other bed bugs passageways.

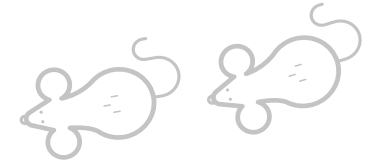

| | |
|------|-----------------|
| CODE | P-04179TAPE |
| PACK | Sales unit 25 m |

MICE AND RATS

MICE AND RATS

WORK RESPONSIBLY.

The professional pest controller needs to become more and more aware of the fact that every time he/she uses tools for managing rodent infestations not only he/she affects the life of the target pest but also the one of non-target animals.

These non-target organisms may come into contact directly with the product or indirectly, for example when they get in contact with rodents that have been poisoned by rodenticides. This is why the use of glue, snap traps, live catch systems and rodenticides must be chosen and used with maximum care in order to reduce the risk of affecting non-target organisms.

A more conscious use of all the available rodent control tools will result in less suffering for pests and a more efficient long lasting result.

inPEST with its team of experts is engaged to raise awareness among its partners and customers of the importance of working according to these principles. In all those situations where the use of rodenticides is discouraged or forbidden, the use of glue boards (wooden glue boards, glue trays, cardboard glue boards, etc.) for managing rodents infestations is almost necessary.

The inPEST **MICE AND RATS GLUE BOARD LINE**, is designed with these principles in mind.

The numerous traps in the range guarantee multiple catches in any environmental condition.

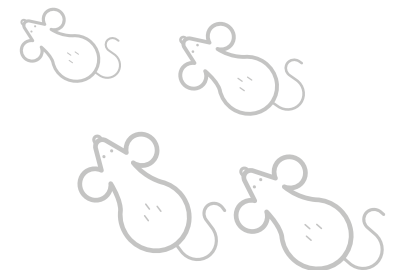

This product line offers ideal solutions both in professional areas (such as food industries, warehouses, hospitals, etc.) and urban areas such as condominiums, offices, homes etc. In an integrated pest management (IPM) program the combined use of glue traps and rodenticides allows the professional PCO to catch poisoned rodents before they die avoiding situations in which rotting carcasses remain lying unnoticed causing unpleasant drawbacks (bad odors, secondary infestations of saprophagous/necrophagous insects etc.).

By placing the traps along the passageways of rodents, these will get caught while moving between their hiding place and their food source. The inPEST mice and rats line includes also multiple catch stations, rodenticide bait boxes and snap traps to meet all different requirements.

STORAGE CONDITIONS OF GLUE TRAPS:

Stored in a cool and dry place (lower than 25°C / 77°F and 55% R.H.) in their original packaging.

Products are guaranteed to perform correctly up to 3 years.

■ UNIVERSAL GLUEBOARD

To monitor *Mus domesticus*, other small size rodents and crawling insects.

- ✓ CHERRY AROMA
- ✓ SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | |
|--------------|----------------------------|
| CODE | P-02038 |
| GLUE AREA | 80 x 132 mm |
| PACK | - |
| OUTER CARTON | Sales unit, 140 pcs |
| PALLET | 29400 pcs, 80x120x140h |

IDEAL FOR

UNIBOX BLACK
P-03039

UNIBOX TRANSPARENT
P-03039T

■ STOP MINI

Monitoring glue board to be used inside multiple catch boxes. To monitor *Mus domesticus* and other small size rodents and crawling insects.

- ✓ ALSO AVAILABLE WITH HAZELNUT AROMA
- ✓ SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | | |
|--------------|----------|--------------------------------|
| CODE | BANANA | P-02009B |
| | HAZELNUT | P-02009N |
| GLUE AREA | | 80 x 180 mm |
| PACK | | 10 pcs |
| OUTER CARTON | | Sales unit, 140 pcs |
| PALLET | | 14000 pcs , 80x120x175h |

IDEAL FOR

MULTI CATCH METAL
P-03036

MULTI CATCH PLASTIC
P-03002

MICE AND RATS - GLUE BOARDS - CARDBOARD

T-STOP

Larger glue area to optimize use inside multiple catch boxes. To monitor *Mus domesticus* and other small size rodents and crawling insects.

- ✓ BANANA AROMA
- ✓ SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | |
|--------------|------------------------|
| CODE | P-02001 |
| GLUE AREA | 90 x 180 mm |
| PACK | 10 pcs |
| OUTER CARTON | Sales unit 100 pcs |
| PALLET | 14000 pcs, 80x120x160h |

IDEAL FOR:

MULTI CATCH METAL
P-03036

MULTI CATCH PLASTIC
P-03002

ULTRA STOP

The cardboard glue trap with the largest glue surface in the range. To monitor *Mus domesticus*, other small size rodents and crawling insects.

- ✓ HAZELNUT AROMA
- ✓ SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | |
|--------------|------------------------|
| CODE | P-02017 |
| GLUE AREA | 110 x 155 mm |
| PACK | - |
| OUTER CARTON | Sales unit, 50 pcs |
| PALLET | 10500 pcs, 80x120x140h |

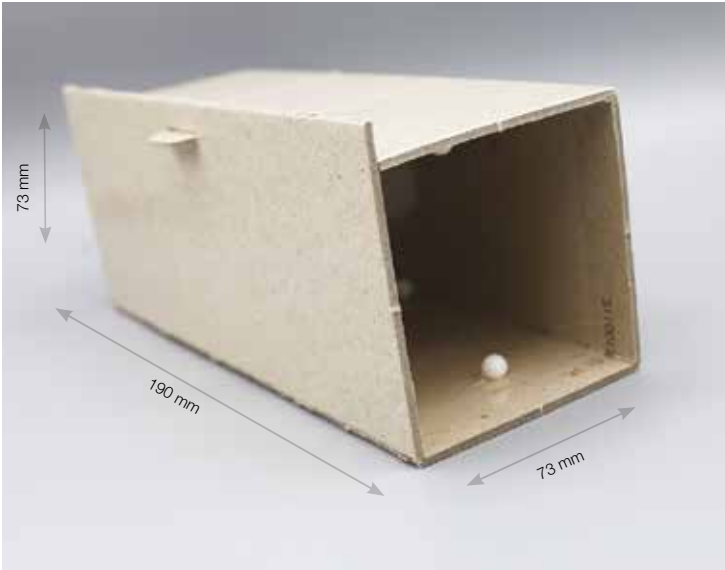

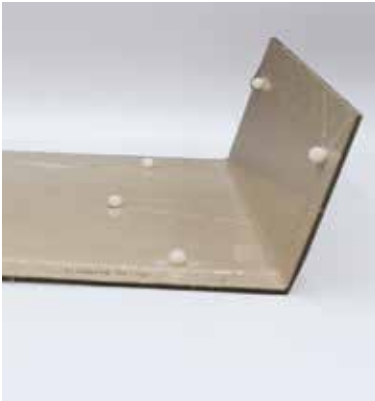

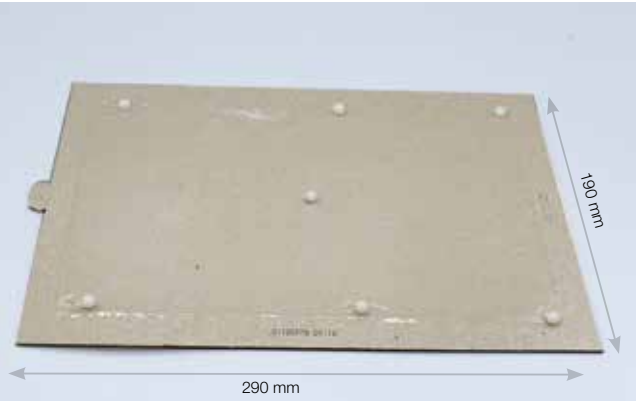

BOOK REFILL

Carton trap, the only rodent glue trap on the market that can be locked in a tunnel shape. The precuts in the cardboard allow to configure the trap in many ways.

- ✓ HAZELNUT AROMA
- ✓ TRAP FOR RAT AND MICE

| | |
|--------------|-------------------|
| CODE | P-02019 |
| GLUE AREA | 250 x 160 mm |
| PACK | 2 pcs |
| OUTER CARTON | Sales unit 60 pcs |

USABLE WITH
BETA 2
P-03019

- ✓ Ideal for use in damp and humid areas where surfaces are often wet due to constant washing (e.g. cheese factories, cafeterias, food industries etc.).

UNIVERSAL GB PLASTIC

To monitor *Mus domesticus*, other small size rodents and crawling insects.

- ✓ CHERRY AROMA
- ✓ SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | |
|--------------|------------------------|
| CODE | P-02038PT |
| GLUE AREA | 80 x 132 mm |
| PACK | - |
| OUTER CARTON | Sales unit 100 pcs |
| PALLET | 21000 pcs, 80x120x140h |

IDEAL FOR:

UNIBOX BLACK
P-03039

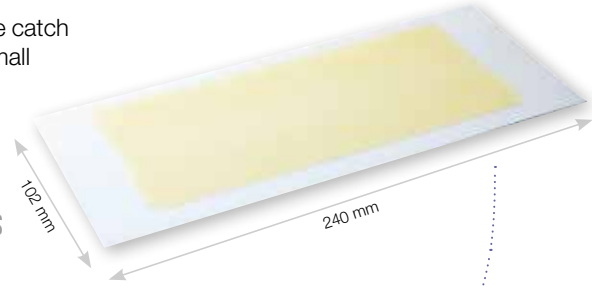

UNIBOX TRANSPARENT
P-03039T

STOP MINI PLASTIC

Monitoring glue board to be used inside multiple catch boxes. To monitor *Mus domesticus* and other small size rodents and crawling insects.

- ✓ BANANA AROMA
- ✓ SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | |
|--------------|------------------------|
| CODE | P-02009BH |
| GLUE AREA | 180 x 80 mm |
| PACK | 5 pcs |
| OUTER CARTON | Sales unit, 100 pcs |
| PALLET | 10000 pcs, 80x120x150h |

MULTI CATCH METAL
P-03036

MULTI CATCH PLASTIC
P-03002

WATERPROOF TRAP

Glue trap in corrugated plastic with holes for fixing with electrical zip ties. To monitor *Mus domesticus*, other small size rodents and crawling insects.

SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | |
|--------------|-----------------------|
| CODE | P-02014 |
| GLUE AREA | 150 x 160 mm |
| PACK | 10 pcs |
| OUTER CARTON | Sales unit, 50 pcs |
| PALLET | 1600 pcs, 80x120x165h |

WATERPROOF BOX

Multi-catch trap in corrugated plastic with holes for fixing with electrical zip ties.

WITHOUT GLUE

SUITABLE FOR MICE AND ALSO FOR COCKROACHES

| | |
|--------------|-----------------------|
| CODE | P-02016 |
| GLUE AREA | without glue |
| PACK | 10 pcs |
| OUTER CARTON | Sales unit, 50 pcs |
| PALLET | 1600 pcs, 80x120x165h |

ECOTRAP MAXI

Monitoring devices used to monitor the presence of larger size rodents like *Rattus rattus* (roof rat), *Rattus norvegicus* (sewer rat). These traps can also be used to monitor smaller size rodents. Trays can also be equipped with a plastic cover (tunnel) which is sold separately.

- ADVANTAGES:
- PALLOWS MULTIPLE CATCHES
 - DUST RESISTANT GLUE
 - IDEAL FOR LOW TEMPERATURES

ECOTRAP MAXI BLACK

- HAZELNUT AROMA
- TRAP FOR RAT AND MICE

| | |
|--------------|--|
| CODE | P-02004G40 |
| PACK | 2 pcs (spot welded together for ease of use) |
| OUTER CARTON | Sales unit 100 pcs (50packs of 2) |
| PALLET | 3200 pcs, 80x120x175h |

IDEAL FOR:

TUNNEL MAXI
P-02020

ECOTRAP MAXI WHITE

- HAZELNUT AROMA
- TRAP FOR RAT AND MICE

| PALLET | 3200 pcs, 80x120x175h |

■ ECOTRAP QUADRO MINI

White glue tray to monitor the presence of *Mus domesticus* and other small size rodents.
PLASTIC COVER (TUNNEL) SOLD SEPARATELY

- ✓ HAZELNUT AROMA
- ✓ TRAP FOR RAT AND MICE

| | |
|--------------|--|
| CODE | P-02013B |
| PACK | 4 pcs (spot welded together for ease of use) |
| OUTER CARTON | sales unit 200 pcs (50 packs) |
| PALLET | 6400 pcs, 80x120x175h |

■ TUNNEL QUADRO MINI

To protect glue trays from dust and water and to exploit rodents behavior to run in narrow places for harborage.

| | |
|--------------|-----------------------|
| CODE | P-02047 |
| PACK | - |
| OUTER CARTON | sales unit 100 pcs |
| PALLET | 6400 pcs, 80x120x175h |

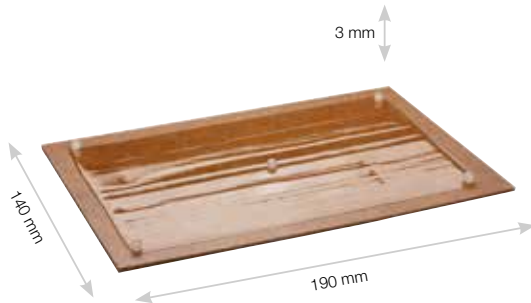

MDF hardboards for temporary corrective actions.
Ideal for livestock industries.

■ REFILL BOARD MINI

To monitor *Mus domesticus* and other small size rodents.

- ✓ HAZELNUT AROMA

| | |
|--------------|-----------------------------------|
| CODE | P-02031 |
| GLUE AREA | 115 x 155 mm |
| PACK | 2 pcs in transparent shrinkwrap |
| OUTER CARTON | sales unit 96 pcs (48 packs of 2) |
| PALLET | 4608 pcs, 80x120x120h |

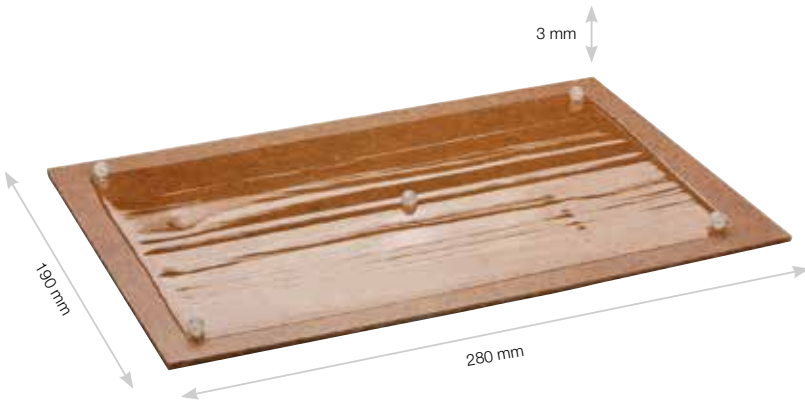

■ REFILL BOARD MAXI

More glue to monitor rodents like *Rattus rattus* and *Rattus norvegicus*.
The device can also be used to monitor smaller size rodents.

- ✓ HAZELNUT AROMA
- ✓ TRAP FOR RAT AND MICE

| | |
|--------------|-----------------------------------|

inPEST's mice and rats boxes line includes three categories:
boxes for inPEST glue boards, boxes for snap traps and boxes for rodenticide/virtual bait.

■ UNIBOX

MULTIPLE CATCH BOX to monitor the presence of mice (*Mus domesticus* and small size rodents) cockroaches (*Blattella germanica*, *Blatta orientalis* and *Periplaneta americana*).

It has **10 ENTRANCE HOLES** for crawling insects and **2 ENTRANCE** holes for mice.

The entrance holes for mice can be “activated” by breaking the plastic along the dotted line and expanding the hole to 25 mm diameter.

THE BOX IS OPENED WITH A SAFETY KEY (INCLUDED).

FLIES, WASPS, FRUITFLIES AND MOSQUITOES

FLIES, WASPS, FRUITFLIES AND MOSQUITOES

inPEST flies, wasps, fruit flies/vinegar flies, mosquitoes line is composed of a series of valid tools to manage infestations in open spaces such as balconies, gardens, orchards or in those areas where beer, wine, alcohol, sugar, etc. are stocked and processed.

Target:

Drosophila spp., *Musca domestica*, *Lucilia caesar*, *Calliphora vomitoria*, *Sarcophaga carnaria*, *Vespidae* in general.

FLIES, WASPS, FRUIT FLIES/VINEGAR FLIES

APPLE TRAP

Funnel entrance for ease of access to insects.

✓ POSITION AT 1,5 M (APPROX. 5 FT) ABOVE GROUND.

| | |
|--------------|------------------------------|
| CODE | P-04025 |
| PACK | - |
| OUTER CARTON | sales unit 10 pcs |
| PALLET | 480 pcs , 80x120x170h |

APPLE DUST

Food based powder for monitoring flies.

✓ IDEAL TO USE WITH APPLE TRAP

| | |
|--------------|-------------------------------------|
| CODICE ART. | P-01027 |
| OUTER CARTON | 50 g (1,8 oz) in plastic bag |
| PALLET | Sales unit, 20 pcs |

VESPOKIL

Food based liquid for monitoring wasps and hornets. Color change and/or separation of ingredients inside the bottle do not compromise the efficacy.
Always shake well before use.
ALWAYS SHAKE THE PRODUCT BEFORE USE.

| | |
|--------------|--------------------------|
| CODE | P-01011 |
| CAPACITY | 500 ml bottle |
| OUTER CARTON | Sales unit, 6 pcs |

✓ IDEAL TO USE WITH APPLE TRAP

FRUIT FLIES/VINEGAR FLIES

CROMOPLUS

Corrugated plastic trap for monitoring fruit and vinegar flies.
CELLULOSE CYLINDER NOT INCLUDED.

| | |
|--------------|--------------------------|
| CODE | P-04056 |
| PACK | 1 pc |
| OUTER CARTON | Sales unit, 6 pcs |

DROSOCYL

PE plastic vial containing a cellulose cylinder impregnated with attractant for fruit and vinegar flies.

✓ VIAL MUST BE USED OPEN.

| | |
|--------------|--------------------------|
| CODE | P-01010 |
| PACK | 1 pc |
| OUTER CARTON | Sales unit, 6 pcs |

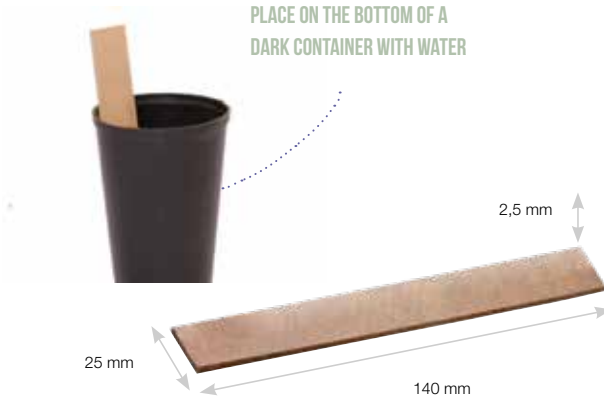

MOSQUITOES

OVIPOSITION STICK

Place inside a dark container with water (let top part of the stick come out of the container as shown).

| | |
|--------------|---------------------------|
| CODE | P-04208 |
| PACK | - |
| OUTER CARTON | Sales unit, 50 pcs |

PLACE ON THE BOTTOM OF A DARK CONTAINER WITH WATER

FRUIT FLIES/VINEGAR FLIES

TRAP BAG

Disposable 3 liter trap for mass capture of flies with specific food powder in a water-soluble bag. Water soluble bag already in the trap.

| | |
|--------------|--------------------|
| CODE | P-04108 |
| PACK | 1 pc |
| OUTER CARTON | Sales unit, 10 pcs |

U.V. FLY KILLERS, U.V. TUBES AND GLUE BOARDS

U.V. FLY KILLERS, U.V. TUBES AND GLUE BOARDS

By law foodstuffs must not be contaminated by external agents such as insects and other infestants. inPEST U.V. fly killer line offers electronic fly killers with glue boards and U.V. tubes that lure flying insects and trap them preventing them from contaminating foodstuffs at the same time allowing PCOs to monitor these pests efficiently. To manage flying insects infestations the position of the fly killer is not the only important thing to take into account, it is also very important to choose the right device for the area that needs monitoring. If devices are placed in the wrong way or are poor quality units they can give an unfounded sense of confidence making the situation worse.

Target:

Flies, mosquitoes, wasps and hornets and all flying insects with positive phototropic response (i.e. attracted by light).

The indicated coverage is indicative.
The area of effect of the U.V. fly killers may vary basing on how objects are placed in the surrounding environment.

POSITIVE PHOTOTROPISM SPECIES OF GREATEST INTEREST IN THE FOOD INDUSTRY

Lepidoptera - Food Moths

Sitotroga cerealella - *Plodia interpunctella*
Ephestia kuehniella - *Ephestia cautella*
Nemapogon granella - *Corcyra cephalonica*

Coleoptera - Food Beetles

Tribolium castaneum - *Tenebrio molitor*
Lasioderma serricorne - *Stegobium paniceum*
Oryzaephilus surinamensis - *Oryzaephilus mercator*
Rhyzopertha dominica - *Antherenus spp.*
Attagenus spp. - *Cryptolestes spp.*

Diptera - Fly, green and blue flyflies, carnaria fly
Calliphora spp. - *Lucilia spp.* - *Drosophila spp.*
Musca domestica - *Sarcophaga carnaria*

Hymenoptera - Wasps and hornets

Vespa crabro - *Vespula spp.* - *Polysles spp.*

Hemiptera - Bugs

Nezara viridula - *Palomena prasina*
Halyomorpha halys

U.V. FLY KILLERS

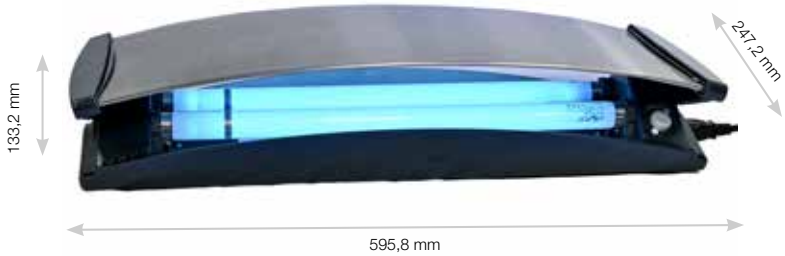

FLY VARIO

Lamp in stainless steel and plastic.

It is equipped with 2 neon 15W lights shatterproof inPEST.

Can be used on the wall in multiple positions, or suspended.

INFOG LINE

The inFOG line equipment is particularly indicated for the volumetric insect treatment of large environments. Targets are food industry flying and crawling insects that can be found where raw materials and finished products are processed and stocked. With specific products it is possible to make disinfectant treatments as well.

What is part of the inFOG line?

- Dryfog, **AN INNOVATIVE COLD ULV SPRAYING DEVICE. DISINFECTANT AND INSECTICIDE WATER SOLUTIONS CAN BE SPRAYED, FOR SATURATING LARGE VOLUMES.**

Its engineered nozzle exclusively sold in Italy by inPEST is able to generate microscopic particles of only 5-7 microns in diameter.

- Bi-spray and Bi-spray compressor: **PORTABLE MICRONIZATION SYSTEMS THAT CAN COLD-SPRAY WATER SOLUTIONS OF INSECTICIDES OR DISINFECTANTS IN MID-SIZE ENVIRONMENTS.**
- Electric spray **AN ELECTRIC POWERED ULV SPRAYER FOR SMALL-SIZE URBAN AND INDUSTRIAL ENVIRONMENTS.**

Dryfog and Bi-spray systems only need compressed air to function. They can be hooked to the compressed air line or to a compressor. They are not equipped with combustion or electric engines so no heat or exhaust gases are generated. For this reason, they can be used in particularly sensitive environments (production lines, food industry warehouses, pharmaceutical industry).

ADVANTAGES

THE PATENTED NOZZLE GUARANTEES A 7-8 MICRON SIZE OF THE DROPLETS WHICH REMAIN SUSPENDED FOR A LONGER TIME

THE FOG DOES NOT WET OR STAIN SURFACES IT COMES INTO CONTACT WITH

IT IS POSSIBLE TO TREAT VERY LARGE VOLUMES (UP TO 20.000 M3 WITH 1 MACHINE).

FIELD OF EMPLOYMENT

FOOD INDUSTRIES, MILLS, FEED MILLS

TRADITIONAL WAREHOUSES WHERE GOODS AT HIGH RISK OF INFESTATION ARE STOCKED (E.G. HAZELNUTS, COCOA BEANS, PASTA, ETC.)
