

TECHNICAL DATA SHEET

1. TRADE NAME: ECOTRAP QUADRO MINI + TUNNEL QUADRO MINI

Monitoring device for the following target pests: *Mus musculus musculus*, *Mus musculus domesticus*), other harmful rodents and crawling insects.

Monitoring device for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: P-02013B (Ecotrap Quadro Mini) + P-02047 (Tunnel Quadro Mini)

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Ecotrap Quadro Mini is a monitoring device (glue trap).

It is composed of:

- White thermoformed polystyrene tray;
- Hazelnut flavoured glue;
- Thermoformed plastic tunnel (optional) for protecting Ecotrap Quadro from dust and water.

Trap size:

- **Length:** 126 mm
- **Width:** 120 mm
- **Heigh:** 12 mm

Tunnel size:

- **Length:** 128 mm
- **Width:** 123 mm
- **Heigh:** 50 mm

Colour: As in the picture

InPEST products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

TECHNICAL DATA SHEET

Place Ecotrap Quadro Mini in the following places:

- near cable trough and electric boards, dishwashers, doors and slots, lofts, storehouses, producing departments, cellars, garages, workshops, etc.;
- along the rooms perimeters to be disinfested and along the rodent habitual paths, which can be identified through excrements, fur, dens, paw prints, etc.
- along the walls.

It can also be used inside containers such as Rodent Stop (P-03065 and P-03065T) for protection from moisture and dust.

The use of safety containers also reduces the capture of non-target animals, which is why it is strongly recommended.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Theoretical covered area: at a distance of 5-10 meters the one from the other, according to the assumed pest infestation.

Suggested monitoring period: all the yearlong, especially in the period between October and April, in which it is registered peaks due to the external temperature reduction.

Suggested frequency of the controls: at least twice daily. Change the trap after two months (at the latest) or before according to the pest infestation or the presence of dust and water in the environment.

The use of the trap in a dusty place could reduce the product functionality in the course of time. For this reason, we suggest its use together with Tunnel Quadro Mini (P-02047).

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%. If well stored (intact packaging), the product shelf life is 3 years.

Information on the Best Practice: Can be used in agri-food environments.

Evaluate the use of the product as it is or inside special containers, depending on the type of environment to be monitored.

The use inside containers allows to protect from dust and also to reduce the chances of catching non-target animals.

In order to respect animal welfare, we recommend a frequency of control of the adhesive traps equal to several times / day (at least 2), as recommended by the Guideline on Best Practice in the Use of Rodenticide Baits as Biocides in the European Union, issued in September 2013 from EBPF (European Biocidal Products Forum).

TECHNICAL DATA SHEET

If, in the control phase of the adhesive trap, a mouse was found alive, it must be killed quickly and humanely. A strong blow to the head is the most advisable method according to the 2006 Animal Welfare Act UK. Absolutely avoid drowning.

If catches of non-target organisms are found, contact a wild animal recovery center (or a wildlife center). The removal of the live animal by unskilled personnel can cause further suffering and injury. Try to remove the animal with liquid paraffin, and then clean it with soap and water, only when it has been impossible to find professional help.

6. PACKAGING AND SPARE PARTS:

Ecotrap Quadro Mini:

- Case: 50 packs (sales unit). Every pack contains 4 pieces, for a total of 200 traps/case.

Tunnel Quadro Mini:

- Pack: bulk
- Case: 100 pieces (sales unit).

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
