TECHNICAL DATA SHEET

1. TRADE NAME: GEOTRAP PLASTIC

Monitoring device for the following target crawling insects: *Blattella germanica*, *Blatta orientalis*, *Periplaneta americana* and *Supella longipalpa*.

Monitoring device for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests presence in a specific place for a defined time.

2. PRODUCT CODE: P-04002GEL

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Geotrap Plastic is a monitoring device (glue trap).

It is composed of:

- Alveolar polypropylene-waterproof (the closed trap has 4 entrances for insects);
- Waterproof hot melt glue, ideal for catching crawling insects;
- Liquorice flavour;
- Red gel previously spread on the glue surface;
- White, black-printed silicon release paper, indicating the instructions for its detachment.

Trap size (open trap):

Length: 240 mmWidth: 199 mm

Trap size (assembled):

Length: 199 mmWidth: 110 mmHeight: 30 mm

Glue Area: 90 x 145 mm

Colour: As in the picture

TECHNICAL DATA SHEET

InPEST products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

Place Geotrap Plastic in the following places:

- near cable trough and electric boards, dishwashers, sinks, ovens, sourdough rooms, platforms, engines, discharges, doors and perimeters, moist and hot environments, and everywhere the presence of crawling insects is suspected;
- in dark areas;
 oOn the floor or on the wall.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Theoretical covered area: at a distance of 5 meters the one from the other, according to the assumed pest infestation.

Suggested monitoring period: all the yearlong, especially in the period between April and October, even though, in a conditioned area, insects are dynamic despite their being subjected to seasons.

Suggested frequency of the controls: weekly. Change the trap after two months (at the latest) or before, according to the pest infestation or the presence of dust, water and/or damp in the environment.

The use of the trap in a dusty place could reduce the product functionality in the course of time.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%. If well stored (intact packaging), the product shelf life is 3 years.

6. PACKAGING AND SPARE PARTS:

- Packs: 10 pieces

- Case: 100 pieces (sales unit)

- Pallet: 5600 pcs, 80 X 120 X 160 cm (h).

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
