

TECHNICAL DATA SHEET

1. TRADE NAME: **STORE TRAP**

Monitoring device for detecting the presence of anobiids like *Lasioderma serricorne* and *Stegobium paniceum*, food moths like *Ephestia kuehniella* and *Plodia interpunctella*, and other flying insects which are present in food industries. This trap must be activated by a specific pheromone.

Monitoring device for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: **P-04028**

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Store Trap is a monitoring device consisting in a glue trap.

It is composed of:

- Carboard (plasticized on the glue side);
- Transparent hot melt glue;
- White, black-printed silicon release paper, indicating the instructions for its detachment.

Measures:

Trap size (open trap):

- **Length:** 400 mm
- **Width:** 90 mm

Trap size (assembled trap):

- **Length:** 190 mm
- **Width:** 90 mm
- **Height:** 40 mm

Glue Area: 70 x 325 mm

Colour: As in the picture

InPEST products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

TECHNICAL DATA SHEET

5. HOW TO USE:

Place Store Trap in the following places:

Inside food industries, storehouses, supermarkets, herbalist's shops, mills, pantries and all those places where it is stocked: wheat, cereals, biscuits, bread, pasta, chocolate, cocoa, candy, dried fruit, nuts, tea, camomile, tobacco, spices, etc.

It must be placed at 1.8-2 m height and must be, according to each case, by a specific pheromone.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Theoretical covered area: 100 m²

Suggested monitoring period: all the yearlong.

Suggested frequency of the controls: weekly. Change the trap after two months (at the latest) or before according to the pest infestation or the presence of dust and damp/water in the environment.

The use of the trap in moist or dusty places could reduce the product functionality over time.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%.

If well stored (intact packaging), the product shelf life is 3 years.

6. PACKAGING AND SPARE PARTS:

- Packs: 10 pieces;
- Cases: 300 pcs;
- Pallet: 18000 pcs/pallet.

Pheromones to be used into Store Trap (to be bought separately):

- Phero-Si V *Lasioderma serricorne* (P-01002F);
- Phero-Si Combined Food moths, anobiids (P-01051): combined pheromone for *Plodia interpunctella*, *Ephestia kuehniella*, *Stegobium paniceum*, *Lasioderma serricorne*.
- Phero-Si Food (P-01048): pheromone for *Plodia interpunctella*, *Ephestia kuehniella*, *Ephestia elutella*, *Cadra cautella* and *Cadra figulilella*.

For other flying insect species, which can be found in food industries, and for other attractant typologies, please, contact our commercial department.

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
