

TECHNICAL DATA SHEET

1. TRADE NAME: CROMOPLUS

Monitoring device to detect the presence of *Drosophila spp.*, to be used together with the cellulose cylinder with active ingredient into PE vial (Drosocyl, P-01010).

Monitoring device for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: P-04056

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Cromoplus is a monitoring device made of cellular polypropylene.

It is composed of:

- N. 1 body trap, parallelepiped shaped (base+covers);
- Adhesive structure, to be doubled along the proper creases;
- N.2 covers, one of which has a specific space for the vial positioning;
- N.1 metal thread for the trap positioning.

Measures:

- **Length:** 133 mm
- **Width:** 133 mm
- **Height:** 230 mm

Colour: As in the picture

InPEST products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

TECHNICAL DATA SHEET

5. HOW TO USE:

Place Cromoplus in the following places:

Terraces, roofs, orchards, gardens, greengrocers, factories processing or storing fruits, vegetables, meat, beer, wine, alcohol and fermentable sugars in general.

Place Cromoplus at 1,5 m height, easily controllable, protected from the sun (for example, under the trees) and in the air flow. Place the trap every 50 m².

The pest attraction is made by the active ingredient of the cellulose cylinder, once placed in the trap. When the trap surface is completely covered with insects, remove the trap and change it with a new one.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Suggested monitoring period: from February to October, according to the season temperature.

Suggested frequency of the controls: Control the trap every 7 days to check the quantity of caught fruit flies. Change the trap in case it is full of insects, or after 2 weeks.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%. If well stored (intact packaging), the product shelf life is 3 years.

6. PACKAGING AND SPARE PARTS:

- Case: 6 pieces (sales unit).

The available spare parts are:

- Drosocyl (P-01010): cellulose cylinder with active ingredient into PE vial: pack of 6 pcs.

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
