

## TECHNICAL DATA SHEET

### 1. TRADE NAME: **EASY TRAP**

Monitoring device for detecting the presence of food moths (*Plodia interpunctella*, *Ephestia kuehniella*, *Ephestia elutella*, *Cadra cautella*, *Cadra figulilella* e *Tinea granella*) in food industries, clothes moths (*Tineola bisselliella* and *Tinea pellionella*) in wool mills and similar industries and other flying insects to be attracted with the specific pheromone dispenser.

Monitoring device for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

### 2. PRODUCT CODE: **P-04078**

### 3. PICTURE:

### 4. TECHNICAL SPECIFICATIONS:

Easy Trap is a monitoring device (glue trap). It is detectable by metal detectors.

#### It is composed of:

- Plasticized cardboard on both sides;
- Specific glue for agriculture;
- Metal eyes to hang the trap;
- Packs in PA (polyamide)/PE (polyethylene) .

#### Trap size (assembled):

- **Length:** 155 mm
- **Width:** 105 mm
- **Height:** 160 mm (h)

**Glue Area:** n.2 areas 120 x 150 mm each

**Colour:** As in the picture

InPEST products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

### 5. HOW TO USE:

## TECHNICAL DATA SHEET

Place Easy Trap in the following places when activated with food moth pheromone: inside food industries, storehouses, supermarkets, herbalist's shops, mills, pantries and all those places where it is stocked: wheat, cereals, biscuits, bread, pasta, chocolate, cocoa, candy, dried fruit, nuts, tea, camomile, tobacco, spices, etc.

Place Easy Trap in the following places when activated with clothes moth pheromone: inside those companies in which wool, furs, sweaters, blankets, carpets, and other textiles or clothes of animal origin, so containing keratin, are produced, processed, or stocked.

The plastic coating of the cardboard makes the trap more resistant to dust, damp and water. The metal eyes can be detected by metal detectors, that's why Easy Trap is the ideal product for food industries, even for its easiness of assembly.

It must be placed at 1,8-2 m height.

Assemble the trap as follows:

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

**Theoretical covered area:** 200 m<sup>2</sup>.

**Suggested monitoring period:** all the yearlong.

**Suggested frequency of the controls:** weekly. Change the trap after two months (at the latest) or before according to the pest infestation or the presence of dust and water in the environment. The use of the trap in dusty places could reduce the product functionality over time.

**Storage conditions:** in a cool and dry room, temperature below 25°C and R.H. below 55%.

If well stored (intact packaging), the product shelf life is 3 years.

During the life of the product, slight aesthetic defects may occur. These defects do not affect the effectiveness of the capture.

### 6. PACKAGING AND SPARE PARTS:

*Trap:*

- Packs of 5 pcs.
- Cases: 60 pcs (sales unit);

*Pheromone dispenser:*

- Phero-Si Food (P-01048): pheromone for *Plodia interpunctella*, *Ephestia kuehniella*, *Ephestia elutella*, *Cadra cautella* and *Cadra figulilella*;
- Phero-Si V Clothes (P-01025): pheromone for *Tineola bisselliella* and *Tinea pellionella*
- Phero-Si *Nemapogon granellus* (*Tinea granella*) (P-01003).

## TECHNICAL DATA SHEET

For other flying insects species, which can be found in food industries, and for other attractant typologies, please, contact our commercial department.

### 7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
