TECHNICAL DATA SHEET

1. TRADE NAME: INSECT PAD + MONITOR GUARD

Insect Pad is a banana flavoured monitoring device for the control of the following target crawling insects: *Blattella germanica*, *Blatta orientalis*, *Periplaneta americana* and *Supella longipalpa*. It is suggested to use Insect Pad inside the Monitor Guard.

Monitoring device for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: P-04074 (Insect Pad); P-04081 (Monitor Guard)

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

Insect Pad is a monitoring device (glue trap). We suggest its use inside Monitor Guard (P-04081). Insect Pad can be further improved thanks to specific food attractants in tablets such as Roach Tab (P-01052) and Multispecies Tab (P-01054), to be bought separately.

Insect Pad is composed of:

- Plasticized cardboard (on the glue side); black grid and words;
- Banana flavoured hot melt glue;
- White, black-printed silicon release paper, indicating the instructions for its detachment.

Monitor Guard is composed of: Plastic – PE.

Sizes: Monitor Guard:

Insect Pad:
- Length: 78 mm
- Width: 59 mm
- Width: 59 mm
- Height: 15 mm

Glue Area on Insect Pad: 40 x 65 mm

Colour: As in the picture

TECHNICAL DATA SHEET

InPEST products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

5. HOW TO USE:

Place Insect Pad inside Monitor Guard in the following places:

- near cable trough and electric boards, dishwashers, sinks, ovens, sourdough rooms, platforms, engines, discharges, doors and perimeters, moist and hot environments, and everywhere the presence of crawling insects is suspected;
- in dark areas;
- on the floor or on the wall.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Theoretical covered area: place the devices at a distance of 5 meters the one from the other, according to the assumed pest infestation.

Suggested monitoring period: all the year long, especially in the period between April and October, even though in a conditioned area insects are dynamic, despite their being subjected to seasons.

Suggested frequency of the controls: weekly. Change the gel inside the trap after two months (at the latest) or before according to the pest infestation.

The use of the trap in damp and dusty places does not reduce the product functionality over time.

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%. If well stored (intact packaging), the product shelf life is 3 years.

6. PACKAGING AND SPARE PARTS:

Insect pad:

- Packs of 10 pcs; Cases of 100 pcs - Sales Unit

Monitor Guard:

- Confezione: bulk
- Cases of 50 pcs (sales unit)

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
