

TECHNICAL DATA SHEET

1. TRADE NAME: REFILL OIL BOTTLE

Mineral oil for the monitoring of the following target insects: *Tribolium* spp., *Sitophilus* spp., *Lasioderma serricorne*, *Oryzaephilus* spp., *Trogoderma* spp., *Cryptolestes ferrugineus*, *Rhyzopertha dominica* and *Liposcelis* spp.

Monitoring device for the IPM application complying with UNI EN 16636:2015 Regulation, that must be applied to control regularly the pests' presence in a specific place for a defined time.

2. PRODUCT CODE: P-04133

3. PICTURE:

4. TECHNICAL SPECIFICATIONS:

The Refill Oil Bottle is a monitoring device consisting of a mineral oil to be used as a trapping system, within FLASH OIL Phero Pack, for the following crawling insects: *Tribolium* spp., *Sitophilus* spp., *Lasioderma serricorne*, *Oryzaephilus* spp., *Trogoderma* spp., *Cryptolestes ferrugineus*, *Rhyzopertha dominica* and *Liposcelis* spp.

The product needs to be used with the combined action of the pheromone dispenser Phero-Si Multispecies (P-01058) and the food tablet MultiSpecies Tab (P-01154).

Quantity of oil: 250 ml

Colour: As in the picture

InPEST products could undergo necessary or opportune technical changes, at any given time, without prior written notice to customers.

TECHNICAL DATA SHEET

5. HOW TO USE:

Cut the spout of the lid near the tip (about 2 mm). After placing inside the compartments the Phero-Si Multispecies and the Multispecies Tab, distribute a thin layer of oil along the inner perimeter of Flash Oil Phero Pack (P-04133).

Place the Flash Oil Phero Pack activated with mineral oil, pheromone and tablet, in the following places:

- inside food industries, storehouses, supermarkets, herbalist's shops, mills, pantries, and all those places where it is processed and stocked: wheat, cereals, biscuits, bread, pasta, chocolate, cocoa, candies, dried fruits, nuts, tea, camomile, tobacco, species, etc..
- near: ovens, rising rooms, hot and wet areas, and in all those places where an infestation outbreak is suspected;
- in dark areas;
- on the floor.

We suggest you to give a number to each trap and indicate its placement in the monitored area plan, in order to facilitate the check during the periodic monitoring.

Theoretical covered area: place the activated Flash Oil Phero Pack at a distance of 3-5 meters the one from the other, according to the assumed pest infestation.

Suggested monitoring period: all the yearlong.

Suggested frequency of the controls: weekly. Check the level of the oil inside the tray at each monitoring and, if necessary, dispense a new dose.

It is suggested its use inside shields like Flash Oil Magnetic Trap (P-04331MAG) or Flash Oil Magnetic Trap Detectable (P-04331MAGF).

Storage conditions: in a cool and dry room, temperature below 25°C and R.H. below 55%. The mineral oil, over time, does not lose its physical properties and its characteristic viscosity, therefore it is not fixed an expiration date.

6. PACKAGING AND SPARE PARTS:

- Package of 5 units.

7. DISPOSAL CONSIDERATIONS:

Waste disposal should be in accordance with existing Community, National and local regulations.
